## Checklist for Patients

Whether online or onsite it always better to bring your

1. Latest prescription that you are following.
2. Bring all prescriptions from all specialities( the same medicine can be prescribed by different doctors)
3. Bring the actual medicines that you are taking (sometimes the medicine prescribed might be different from that being actually taking either in dose or composition)
4. Any reports that you have done within six months
5. If you use any inhaler or spacer -please bring it with you-our team will teach you the correct technique
6. If you use insulin pen, then please bring it with you-our team will verify the dose and technique.
7. If you are diabetic or pregnant and coming for an onsite visit- please bring a small snack with you.

Not For Medico-legal purpose. Clinical correlation is essential for diagnosis. Kindly contact the lab if test results are unsatisfactory.
